

Petro Power System 2

*Creating Systems to **C**ontrol, **P**ower & **I**ntegrate Your Business*

The **CPI Petro Power System 2 (PPS2)** is designed and manufactured by CPI to supply our customers with a cost effective, quality, easy-to-install fueling controls solution that complies with paragraph 514-6 of the National Electric Code and a lighting controls solution in a single enclosure. Paragraph 514-6 states that “..each dispensing device shall be provided with a means to remove all external voltage sources, including feedback, during periods of maintenance and service of the dispensing equipment.” The **CPI Petro Power System 2** combines complete power isolation with complete lighting control.

Standard System Includes:

- Fueling Emergency Stop Pushbutton
- Fueling Reset Pushbutton
- Submersible Pump Status Lights
- Dispenser Power Contactors
- Dispenser Isolation System
- Dispenser Maintenance Switches
- Submersible Pump Power Contactors
- Lighting Controller
- Individual, Illuminated Zone Override Pushbuttons
- Interface Terminal Strips
- (2) Panelboards

System Standards:

- Complete system is UL Listed product
- Meets or exceeds NEC requirements

Electrical Requirements:

- 120V, 15A Supply Circuit
- 30A Standard Contactor Switching Capacity (higher capacities available upon request)
